Rainforest Alliance Certified crop list

Version 1.1

This is the crop list of crops that can be certified with the Rainforest Alliance program.

At farm level all herbs, spices and herbal tea ingredients should be certified under the [UEBT/RA program](#), but there are exceptions allowing crops in the “UEBT/Rainforest Alliance” certification scope to be certified under the Rainforest Alliance Certification program:

- Chili and Pepper (black, white and green) can be certified under Rainforest Alliance or UEBT/Rainforest Alliance.
- If the crop is grown together with (an) other Rainforest Alliance certified crop(s).
Example: Coffee & Cardamom.

If a crop is collected from the wild, the UEBT/RA program always applies on production level.

If you want to certify crops at farm level that are in the “UEBT/Rainforest Alliance” certification scope, you must be certified through the UEBT/Rainforest Alliance Herbs & Spices Program.

Please contact: certification@UEBT.org.
